

## RFID-Enabled Consignment Solution

Consignment program enables medical distributors to give hospitals immediate access to high priced, life saving products with no up-front inventory costs or risk of outdating. Hospitals gain product access with minimal cash outlay and risk. xecan's RFID enabled consignment technology provides automated item-level inventory tracking and management at real-time through Internet.

### Distributor Benefits:

- Manage consignment inventory through a web-browser
- Real-time item-level inventory tracking
- Replenishment list alerts
- Expiration item lists notifications

### Hospital Benefits:

- On-hand supply of medicine
- No up-front cost to hospital
- No product outdating or overstocking
- Eliminates most emergencies
- Check consignment's stock on-line
- Hospital saves money

### How It Works

1. Distributor implements xecan solution in a few days timeframe. Hospital enrolls in distributor's consignment program.
2. Distributor & hospital determine product mix and volumes.
3. Hospital receives inventory from distributor. Inventory automatically monitored and managed by xecan Solutions through Web.
4. Hospital pays for products only if the products were used.
5. Distributor re-stocks distributor's inventory as notified by xecan solutions.

**xecan's** technology breakthroughs enable healthcare consignment program low-cost and plug-and-play.
